

## Model Performance Test

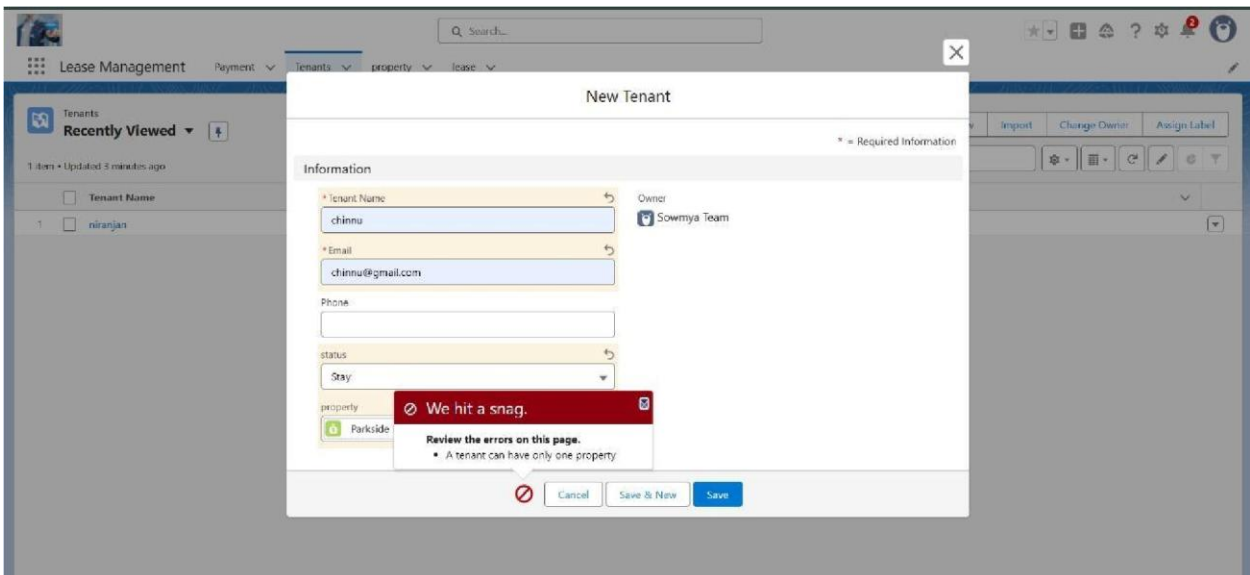

Date	26 JUNE 2025
Team ID	LTVIP2025TMID30578
Project Name	Lease Management
Maximum Marks	

### Model Performance Testing:

#### Trigger Error:

Validation logic is applied when incorrect or mismatched data is entered during lease record creation (e.g. lease start date after end date).

System throws an error and prevents record creation.

## Validation Check – Dates Different & End Date is Less:

Business rule checks that lease End Date must be after Start Date. If End Date is lesser, system shows validation error and restricts submission.

The screenshot shows a CRM interface for a lease record named 'supriya'. The 'Details' tab is active. The form contains the following fields:

- Lease Name:** supriya
- Owner:** Sowmya Team
- Start date:** 6/20/2025
- End date:** 6/19/2025
- Property:** Search property...
- Created By:** Sowmya Team, 6/23/2025, 3:13 A
- By:** Team, 6/25/2025, 7:38 AM

A red error message box is displayed over the form, stating: "We hit a snag. Review the following fields: start date". Below the error message are "Cancel" and "Save" buttons. The "Save" button is disabled. The right sidebar shows the "Activity" section with filters and a list of activities.

## Validation Rule Check – Dates Same:

A validation rule ensures Start Date and End Date cannot be the same. System flags this as invalid and prompts user to revise inputs.

The screenshot shows a CRM interface for a lease record named 'supriya'. The 'Details' tab is active. The form contains the following fields:

- Lease Name:** supriya
- Owner:** Sowmya Team
- Start date:** 6/20/2025
- End date:** 6/19/2025
- Property:** Search property...
- Created By:** Sowmya Team, 6/23/2025, 3:13 A
- By:** Team, 6/25/2025, 7:38 AM

A red error message box is displayed over the form, stating: "We hit a snag. Review the following fields: start date". Below the error message are "Cancel" and "Save" buttons. The "Save" button is disabled. The right sidebar shows the "Activity" section with filters and a list of activities.

## Flow Testing – Payment Update:

Flow automation updates Payment Status automatically upon payment log entry.

Test confirms the status updates accurately and triggers notification.
